

Automation Engineer / PLC/HMI/SCADA Programmer

 **Location:** Seroki-Parcela / Hybrid

 **Contract type:** Employment contract, B2B, or contract for specific work

Job Description:

We are looking for an experienced automation engineer / PLC/HMI/SCADA programmer to join our team and assist in the design, implementation, and optimization of industrial automation systems.

About us:

Bio-Proces is a Polish company with a strong market position, offering a wide range of products and services related to biogas and wastewater treatment, among other areas.

Scope of Responsibilities:

- Programming PLC controllers (Delta, Siemens, Allen-Bradley, Schneider, or others).
- Creating and configuring HMI interfaces and SCADA systems.
- Diagnosing and troubleshooting faults in automation systems.
- Collaborating with the project team.
- Creating technical documentation.
- Participating in commissioning within the scope of automation.

Requirements:

- Technical education (electrical engineering, automation, robotics, or related fields).
- Experience in programming PLC, HMI, and SCADA.
- Knowledge of communication protocols (Modbus, Profibus, Ethernet/IP).
- Ability to analyze and solve technical problems.
- Willingness to travel, category B driving license.

We Offer:

- ✓ Stable employment in a rapidly growing company.
- ✓ Opportunities for professional development and acquiring new skills.
- ✓ Necessary work tools.
- ✓ A friendly work atmosphere and team support.
- ✓ Flexible working hours depending on the project.

 If you're ready for new challenges, we look forward to your application!
